Press Release

In addition of making samples and presets for various companies, Particular Sound, founded by Ingo "Traumatic" Nasse and Frank "Xenox" Neumann back in 2002, will release small sample packs on our website, too.

"Abstract Grooves" is the first Library we release.
It's a drumloop Library with beat loops, element loops and single sounds.

All the loops in this sample pack are recorded in 128Bpm, 24bit and 44,1kHz, the WAV format is supported by all DAW's like Apple Logic Pro/Garageband, Steinberg Cubase, Ableton Live, FL Studio and many, many others...

Abstract Grooves has several "main loops" and additional element loops like no kick and no snare loops as well as snare, clap, kick and granular based samples.

The loops are perfect for layering them to your main beat to add some extra groove to your existing tracks.
All together it's a cool micro package with some great sounds and very groovy beats and with the one shot samples it is easy to create great loops without slicing.

Features:

- 582 MB total content
- 559 MB Loop content
- 23 MB WAV content

- 268 Drumloops
- 155 Main Drumloops
- 12 Uplifter Loops
- 43 Kick Samples
- 34 Snare Samples
- 10 Clap Samples
- 81 Element Samples

Format:

- 24bit WAV Stereo

Abstract Grooves is only available on our website for 12,99€ till the end of march, from april 2014 on, Abstract grooves price will arise to 19,99€.
