

Abstract Grooves

(C)opyright by Particular - Sound
<http://www.particular-sound.de>

Welcome

Thank you for purchasing "Abstract grooves" from Particular - Sound.

This is the first product we release on our own website, after working for a lot of different companys in the business, we decided to release our own stuff from time to time.

Abstract grooves was made mainly out of granular based samples, we recorded everything we got on our hands and used granular based synthesizer and effects, to find something interesting in it.

Every Drumloop was made in 128BPM, with a Sampler like Kontakt, you can slice them up to use them in different tempos or drag'n'drop them into your DAW. In the near future, we will release a Kontakt version, too and maybe some more, different formats like EXS24 or Apple Loops.

The Loops are perfect to use them in the background, layer them under your main Drums and your track will start to groove...!

We hope you have fun using this Library and please, let us know what do you like or dislike...

About us

Particular - Sound was founded by Ingo "Traumatic" Nasse and Frank "Xenox" Neumann.

We started Particular - Sound with the idea, to help companys working on there synthesizer and / or to make sample content for their products.

On our list are big companys like Yamaha Europe, Native Instruments, Waldorf, reFX, LinPlug Virtual GmbH, Ableton, MOTU and more.

If you have questions about our work, don't hesitate and contact us...!

Please, visit the following website and contact us...

<http://www.particular-sound.de/wordpress/about/contact-us/>

How to install

Well, there is nothing to install, you can use the WAV-Files in any DAW (Digital Audio Workstation) or you can use them in a Sampler like Kontakt from Native Instruments.

Terms and conditions

License Agreement:

If you bought the sample library from our website, you can use all the sounds and samples from Particular-Sound in a commercial and non-commercial project, that means, you can use them for your music, video, game or whatever you're working on without any problem.

You got only the license to use it in your projects, when you bought it from our website, the sounds and samples were still licensed to you, not sold.

Remember this please, you were not allowed to use samples in other sample libraries, but you can use the samples, to create new stuff (Layering).

Usage and copyright:

Copying, re-selling, leasing and duplicating or distribution is not allowed.
But, you are allowed to use the samples to create new stuff.
Selling single sounds is not allowed.

All the content is lying under the copyright by Particular-Sound.

In other words, use it, make your own stuff and have phun...! ;)
